

TF21

This is a digital signage specially designed for restaurants and catering services. Its ultra slim body completed with a brushed brass frame provides a classic, yet elegant design. Using the interactive touch screen customers can learn more about the restaurants, dishes and also the latest information while they are waiting to be seated. This will attract more people looking at the menu and can save time ordering. Customers can even send their order direct to the kitchen and the system can provide a table number. With a build-in printer, the customer can also print their menu of choice.
