

# TF24

The TF24 is a standard interactive digital signage, which can be used alternately in portrait- or in landscape orientation. It is specially designed for public areas but can very well be used for corporate purposes or for educational assistance. The brushed stainless steel frame provides a luxurious finish. High brightness LCD screen and sensitive touch screen improve the interaction between user and information provider. It can be provided with a built-in camera and microphone, so the user can have direct personal contact with a service employee. When wheels are attached under this kiosk it is easy movable.
